Buy the dip on 5G potential

We confirm our Buy recommendation and lift our target price to EUR 30.9 (previously: EUR 30.0), as we see Kontron well on track to monetize its 5G potential going forward.

Integration and streamlining following the Katek integration are proceeding well, while order intake and especially the order pipeline keep expanding at a high pace.

We regard the sell-off after 2Q25 following a slower call-off of smart wallboxes overdone, as this business potential is just starting to become unleashed.

Kontron continues to trade at hefty discounts to all peers in our peer group, which is why our multiple-derived target value reaches EUR 78.5! For our target price, we relied on our DCF.

Kontron trades at an EV/EBITDA of 6.8/6.8/5.8x and a P/E of 10.2/10.5/8.9x for FY25-FY27e, hence at discounts of about 65-70% to the peer group median and about 40-70% to close peers Advantech and SECO.

Kontron on track

We have always regarded 2025 as a transition year, in light of the integration of Katek and narrowing down to core businesses through disposal or discontinuation. The real potential continues to lie ahead in the form of 5G applications, especially in the verticals transportation, automotive and industrial. Hence, we continue to have a strong focus on design wins and the order book, providing an indication of how such a potential can start to become unleashed towards the end of FY26.
In 2Q25, design wins (project pipeline) grew 29% y/y and 4% q/q, while the order book climbed 16% y/y, but decreased 2% q/q. The sequential decrease can be attributed to a negative effect from USD translation and the deconsolidation of JumpTec. The latter generated about EUR 90mn in sales in FY24 and we expect the deconsolidated order book somewhat below this figure.

1H25: Design wins, order book, pipeline/order book multiple

Source: Company; Erste Group Research

Following the sale of JumpTec, which relates to the COMs (Computer on Modules) business, Kontron adjusted its guidance for FY25. Revenue is now expected at about EUR 1.8bn (previously EUR 1.9-2.0bn), EBITDA above EUR 270mn (previously: EUR >220mn). Included in the new EBITDA guidance is a book gain of EUR 56mn from the JumpTec sale and an inventory write-down of EUR 8mn related to the greentec portfolio, which comprises PV inverters and smart wallboxes. We expect the impairment to relate to the former, as Katek used a positive one-off to reduce excess inventories in an oversupplied market environment.

What to watch in 2H25?
Kontron is a beneficiary of the introduced US tariffs, given its local production footprint. In addition to a continuation of pipeline growth, we would expect order intake in the global segment (US, Asia) to start benefitting. Obviously, the call-offs for smart wallboxes will also be a strong focus.

- The major changes to our estimates stem from the sale of JumpTec, related one-offs and aligning our top line estimates to the new company guidance for FY25.
- All other changes are a consequence of the mentioned adaptions.

Kontron trades at discounts of about 65-70% to the peer group median and about 40-70% to close peers Advantech and SECO.

The Document is based on reasonable knowledge of Erste Group's analyst in charge of producing the Document as of the date thereof and may be amended from time to time. It only serves for the purpose of providing non-binding information and does not constitute investment advice or marketing communication.

This Document does not constitute or form part of, and should not be construed as, an offer, recommendation or invitation to subscribe for or purchase any financial or connected financial instrument, and neither this Document nor anything contained herein shall form the basis of or be relied on in connection with or act as an inducement to enter into any contract or inclusion of a financial or connected financial instrument in a trading strategy. The document is also not a prospectus in the sense of the Prospectus Regulation, the Austrian Capital Market Act 2019 or comparable legal provisions. All information, analysis and conclusions provided herein are of general nature. This Document does not purport to provide a comprehensive overview about any investment, the potential risks and results nor does this Document take into account any individual needs of an investor (the "Investor") in relation to proceeds, tax aspects, risk awareness and appropriateness of the financial instrument or connected financial instruments. Therefore, this Document does not replace any investor- and investment-related evaluation nor any comprehensive risk disclosure; any financial instrument has a different risk level. Performance charts and example calculations do not provide any indication for future performance of a financial instrument resp. connected financial instruments. Information about past performance does not necessarily guarantee a positive development in the future and investments in financial instruments incl. connected financial instruments can be of risk and speculative nature. All projections, forecasts and price targets are clearly and prominently labelled as such, and the material assumptions made in producing or using them are indicated. Forecasts of future developments are based purely on estimates and assumptions. Actual future developments may differ from the forecast. Forecasts are therefore not a reliable indicator of future results and developments. The weaker the Company's credit-worthiness is, the higher the risk of an investment will be. Not every investment is suitable for every investor. Neither this document nor any of its components form the basis of any contract or commitment whatsoever. Therefore, Investors shall consult their advisors (in particular legal and tax advisors) prior to taking any investment decision to ensure that – irrespective of information provided herein – an intended transaction of a financial or connected financial instrument is appropriate for the Investor's needs and intention, that the Investor has understood all risks and that, after due examination, the Investor has concluded to make the investment and is in a position to bear the economical outcome of such investment. Investors are referred, for instance, to the suitability test according to the Austrian Securities Supervision Act 2018 and are advised to mind the client information pursuant to the Austrian Securities Supervision Act 2018. The performance of an investment is reduced by commissions, fees and other charges that depend on the individual circumstances of the investor. As a result of currency fluctuations, the investment result may increase or decrease.

Erste Group rating definitions

Buy	> +20% from target price
Accumulate	+10% < target price < +20%
Hold	0% < target price < +10%
Reduce	-10% < target price < 0%
Sell	< -10% from target price

Our target prices are established by determining the fair value of stocks, taking into account additional fundamental factors and news of relevance for the stock price (such as M&A activities, major forthcoming share deals, positive/negative share/sector sentiment, news) and refer to 12 months from now. All recommendations are to be understood relative to our current fundamental valuation of the stock. The recommendation does not indicate any relative performance of the stock vs. a regional or sector benchmark.

A history of all recommendations within the last 12 months is provided under the following link:
Research Disclaimer | Erste Group Bank AG

Explanation of valuation parameters and risk assessment
Unless otherwise stated in the text of the financial investment research, target prices in the publication are based on a discounted cash flow valuation and/or comparison of valuation ratios with companies seen by the analyst as comparable or a combination of the two methods. The result of this fundamental valuation is adjusted to reflect the analyst's views on the likely course of investor sentiment. Whichever valuation method is used there is a significant risk that the target price will not be achieved within the expected timeframe. Risk factors include unforeseen changes in competitive pressures or in the level of demand for the company's products. Such demand variations may result from changes in technology, in the overall level of economic activity or, in some cases, from changes in social values. Valuations may also be affected by changes in taxation, in exchange rates, in the capital market sentiment and in regulatory provisions. Investment in overseas markets and instruments such as ADRs can result in increased risk from factors such as exchange rates, exchange controls, taxation, political, economic and social conditions.

All market prices within this publication are closing prices of the previous trading day (unless otherwise mentioned within the publication).
Detailed information about the valuation and methodology of investment research by the Erste Group Bank AG is provided under the following link: https://www.erstegroup.com/legal/Bewertungsmethoden_and_Valuations.pdf

Planned frequency of updates
Target prices for individual stocks are meant to be 12 month target prices, starting from the date of the publication. Target prices and recommendations are reviewed usually upon release of quarterly reports, or whenever circumstances require.

Periodical publications are identified by their respective product name and indicate update frequency as such (e.g. Quarterly). Recommendations mentioned within these publications are updated in an according frequency, unless otherwise mentioned (e.g. a 12M TP is not updated on a monthly base, even when mentioned in summarizing monthly/quarterly product).

If a recommendation change has been made in this publication, please see the following link for a detailed overview of the previous recommendation(s):
