

Kontron Transportation

Leading global supplier of end-to-end
communication solutions for
mission-critical networks

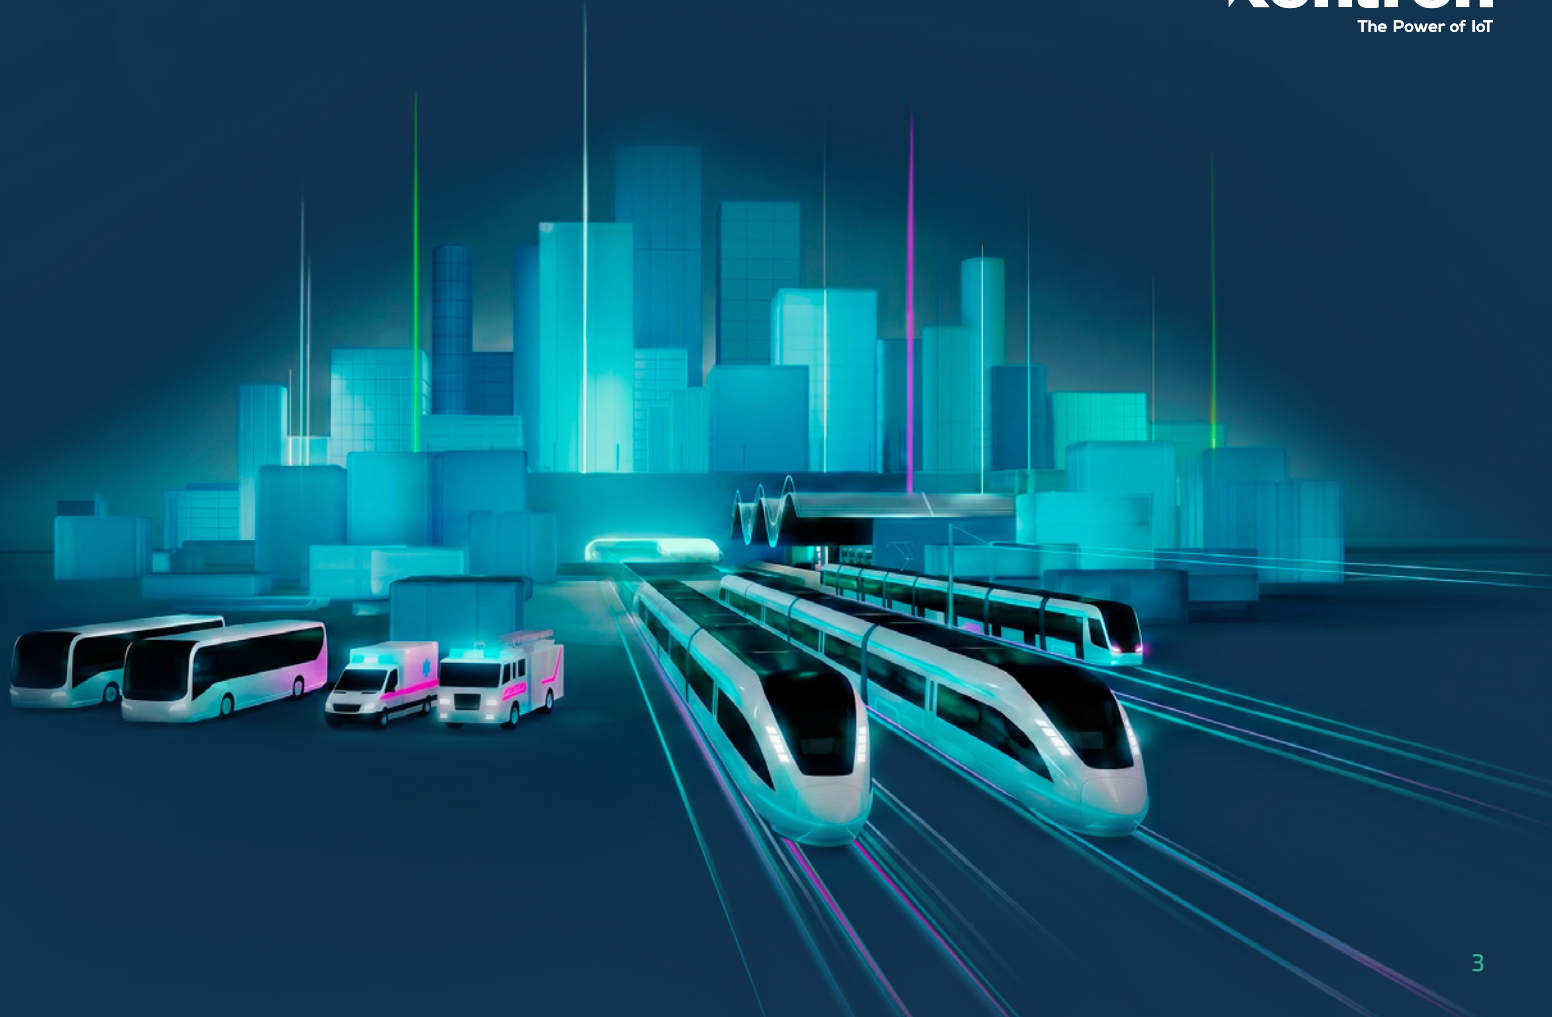

Your Trusted Partner. **Now. Tomorrow.**

At Kontron Transportation, we deliver end-to-end communication solutions that seamlessly integrate our own innovations with trusted partner technologies.

Through decades of industry experience and a commitment to engineering excellence, we craft systems perfectly tailored to our customers' requirements.

Beyond our communication expertise, we also enhance the passenger journey with innovative ticketing solutions that make public transport smoother and more convenient for everyone.

At a Glance

With more than 700 employees spread across 11 office locations, we serve 100+ customers in over 25 countries.

Over 100.000 track kilometers have already been equipped with the modern communication systems of Kontron Transportation.

Responsible **by Design**

Responsibility is an integral part of how we operate. We invest in sustainable solutions, empower our employees and young talents, and foster an inclusive workplace built on fairness and equal opportunity.

**Our commitment goes beyond compliance—
it's part of who we are.**

Customer Segment

Railways

Mission-critical communication is in our DNA. For over 30 years, we have been fully dedicated to the railway sector, delivering end-to-end communication solutions for operators worldwide.

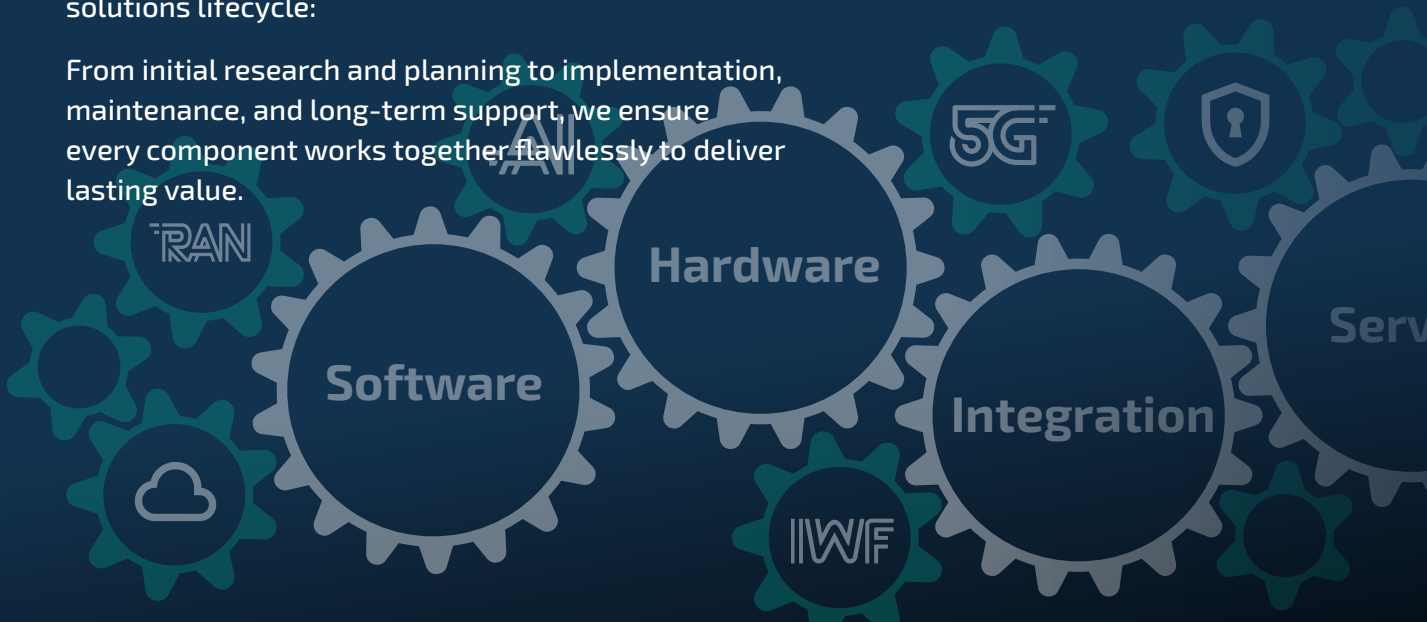

From major mainline networks to secondary and regional lines, we provide reliable systems and comprehensive long-term support to ensure continuity, performance, and resilience across the entire lifecycle.

At Your Service

Our end-to-end services portfolio spans the entire solutions lifecycle:

From initial research and planning to implementation, maintenance, and long-term support, we ensure every component works together flawlessly to deliver lasting value.

Security Without Compromise

Cybersecurity is a fundamental requirement for mission-critical communication systems. We support our customers with secure-by-design solutions that protect networks, data, and operations across their entire lifecycle.

By combining robust concepts, regulatory awareness and organizational process alignments, we help operators meet evolving cybersecurity demands and ensure resilient, trustworthy communications by complying with the Cyber Resilience Act, KRITIS and NIS2.

WE
CREATE
FRMCS

We have been a core contributor to the Future Railway Mobile Communication System from the very beginning, shaping its technical foundations, guiding its standardization, and validating its implementation across Europe.

Through deep engagement in 3GPP, ETSI, UIC, ECC, and key EU research projects, we ensure that FRMCS reflects the real-world needs of railway operations and can be deployed effectively in live environments.

We are the #1 partner for railways in their migration to FRMCS and beyond.

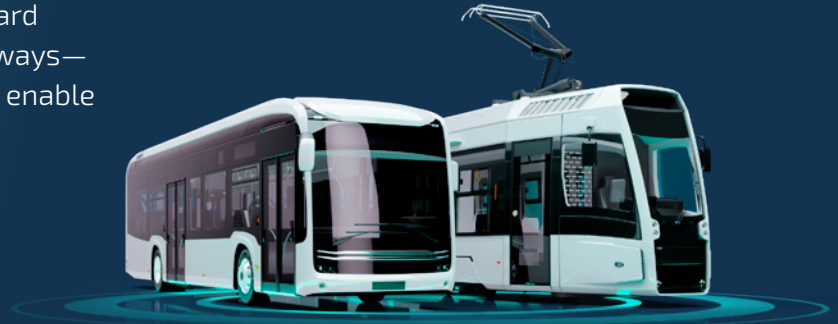

Customer Segment

Public Transport

Our public transport division delivers future-ready, integrated hardware and software solutions for account-based ticketing, fare collection, and intelligent transport systems.

Our portfolio includes advanced embedded computing platforms—such as onboard computers and communication gateways—that power seamless operations and enable smart, efficient mobility.

With more than 60,000 devices deployed in the field, ITxPT compliance across all key solutions, and systems serving over 12 million passengers every day, we deliver proven mobility solutions at scale.

Customer Segment **Mission-Critical Industries**

Beyond railways and public transport operators, our solutions also serve public safety authorities such as police and fire services, as well as industrial operations including manufacturing sites, ports, airports, and utilities.

With our future-proof MCx communication suite and high-performance repeater solutions, we enable reliable, interoperable communications that ensure operational continuity today and into the future.

About Kontron Transportation

Kontron Transportation is a leading global supplier of end-to-end communication solutions for mission-critical networks. The company specializes in systems that produce, transport, and process voice, data, and video—reliably, securely, sustainably, and efficiently.

Its solutions include GSM-Railways, FRMCS (Future Railway Mobile Communication Systems), and MCx (mission-critical services, including MCx OTT) with IWF (interworking functions).

It also offers enhanced radio solutions, transmission networks, and cybersecurity solutions. In addition, the portfolio includes communication products for secondary lines and other mission-critical network operators. The company also provides mobility solutions like validators and fare collection systems for public transport operators.

Kontron Transportation is part of the Kontron Group.
