Fare Collection That Fits Your Network

One flexible, account-based platform connecting riders, fares, and operations

More Flexibility for Riders. More Control for Agencies.

mobi.fare is Kontron's account-based ticketing solution, designed to bring the fare experience together—from how riders pay and travel to how agencies configure, manage, monitor, and understand their fare network.

› Your fare policy. Your way.

Configure fare products and rules around the way your network actually works, then adapt them as your fare strategy evolves.

› More ways to ride.

Give passengers flexible ways to access and manage fares through supported mobile and web experiences, QR and NFC credentials, and compatible contactless payment options.

› See more. Manage more.

Bring rider accounts, fare activity, ridership information, and device status into one back-office environment, giving your teams greater visibility across the fare network.

One connected fare environment. Built to move with you.

What Could Your Fare System Do If It Were Built Around Your Network?

From fare policy and passenger accounts to devices, customer service, reporting, and integrations, mobi.fare connects the tools agencies need to manage the complete fare experience.

Configure Fares with Confidence

Manage fare products, rider classes, routes, zones, transfers, pricing, and caps from one back office.

Turn Fare Data Into Insight

View purchases, validations, ridership patterns, and fare-system data to support planning and operations.

Give Riders More Control

Let riders access accounts, purchase fares, manage payments, and review activity through mobile and web tools.

Monitor Device Status

Track equipment status, connectivity, and operational issues across the network from the back office.

Support Customers Faster

Give service teams visibility into rider accounts, transactions, and fare activity to resolve issues faster.

Connected Ecosystem

Connect mobi.fare with agency and third-party systems through APIs and integration capabilities.

mobi.fare provides a flexible account-based ticketing foundation that can be configured around your network today—and evolve with your fare program tomorrow.
