

With manufacturing capabilities across North America and Europe, Kontron helps strengthen supply chain resilience while reducing reliance on overseas production and navigating evolving trade requirements.

From smart transit systems and connected aircraft to rail networks, Kontron enables real-time connectivity, communications, and data exchange across the transportation ecosystem.

From edge computing and AI to digital fare collection and intelligent infrastructure, our modular platforms help transportation operators deploy flexible solutions built for evolving operational needs.

From rapid prototyping and small-batch builds to high-volume production, our engineering and EMS capabilities help customers move from concept to production with confidence.

Solutions to your biggest challenges

➤ Modernize Fare Collection

with flexible payment options, open payment systems, and digital ticketing solutions.

➤ Keep Passengers Connected

with reliable onboard Wi-Fi, 5G, and rugged communications technology.

➤ Turn Data Into Smarter Decisions

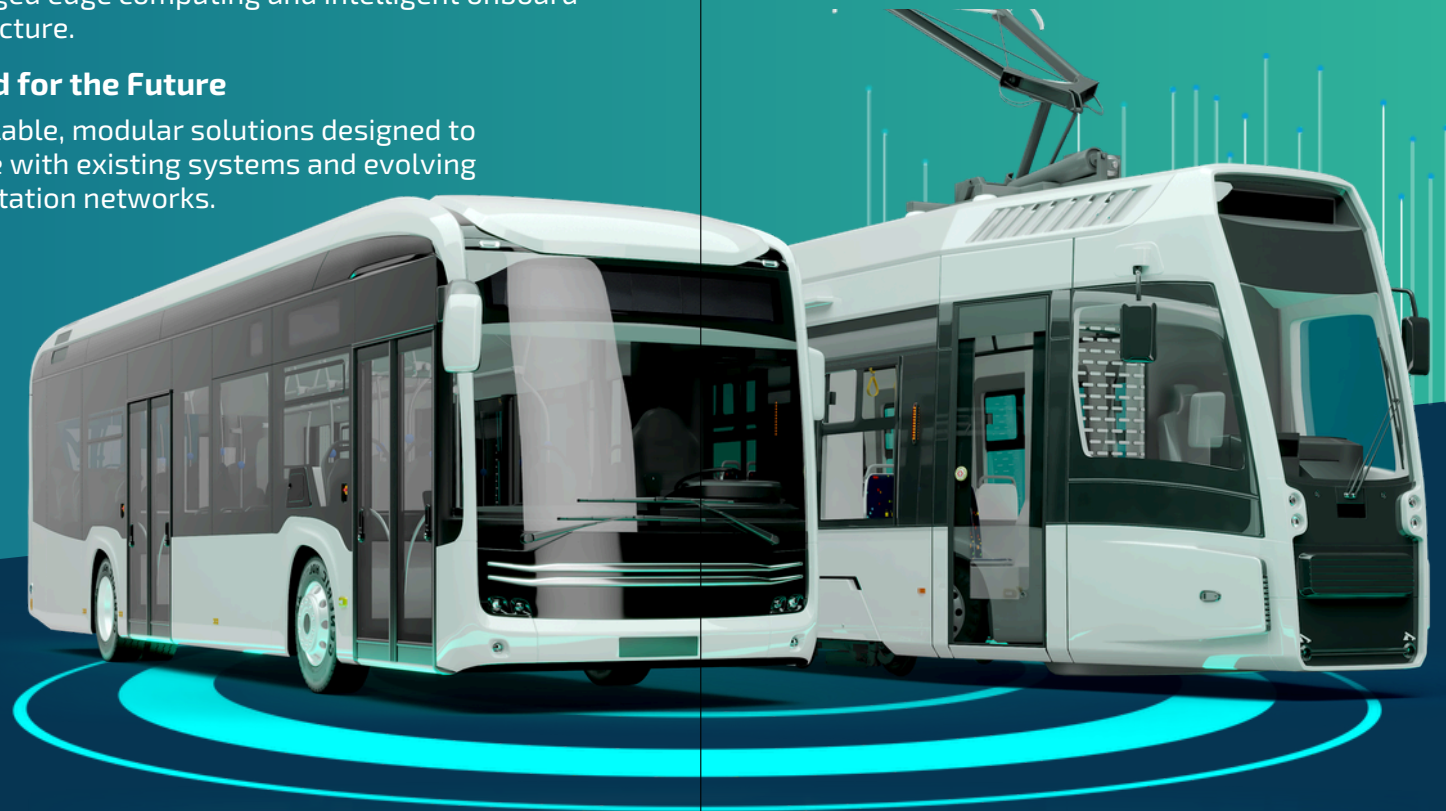

with rugged edge computing and intelligent onboard infrastructure.

➤ Build for the Future

with scalable, modular solutions designed to integrate with existing systems and evolving transportation networks.

kontron

Your Trusted Partner in Smarter, More Connected Transportation

We deliver rugged computing, connectivity, and intelligent **transportation solutions across public transit, rail, aviation, and more.**

Our modular, open-architecture platforms enable connected fleets, smarter operations, digital fare collection, and real-time edge intelligence.

The Power of IoT

Fare collection & ticketing

Flight systems & connectivity

Railway & intelligent infrastructure

Onboard connectivity & communications

Rugged edge computing

Integrated software

Electronics Manufacturing Services (EMS)

Engineered for seamless integration, flexible customization, and long-lifecycle support.

Benefit from:

- ✓ Advanced Engineering
- ✓ Industry Certifications
- ✓ Tailored Support
- ✓ Worldwide Footprint

With our solutions, you gain a competitive edge.

Turn transportation challenges into opportunities with smarter connectivity, flexible technology, and solutions built to improve efficiency, elevate the passenger experience, and prepare you for what's next.
